DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-39 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-39 of copending application 10/310,003. This is a double patenting rejection.

Claims 1-39 of the Application are identical to claims 1-39 of the copending application. The claims of both applications disclose the same an apparatus and method of fragmenting ions, trapping ions in a an ion trap, resonantly exciting selected trapped ions by subjecting them to an alternating potential to thereby promote collision-induced dissociation of at least a portion of the trapped ions; and dampening the oscillatory motion of the resonantly excited selected ions approaching a periphery of the trap to thereby reduce the probability of the selected ions ejecting from the trap.

Except for the 101 double patenting problem as outlined above, no other prior art was found to disclose or make obvious the key features of the applicant's invention.
